

Summary:

The dashboard provides an in-depth analysis of the market capitalization and quarterly sales of major companies across different sectors, emphasizing the distribution of market cap into **Large Cap**, **Mid Cap**, and **Small Cap** categories. Companies like **Reliance Industries**, **Tata Motors**, and **SBI** lead in terms of market capitalization, contributing significantly to the overall market dynamics. The comparative analysis between these companies highlights the diversity in market size and quarterly sales. Large-cap companies have the largest share of the market, while mid-cap and small-cap companies play a more modest role in market performance. The average quarterly sales figures further reinforce the dominance of large-cap companies, with a clear distinction in performance across company groups. This analysis can provide valuable insights for investors and stakeholders aiming to understand market trends and company performance in the Indian business landscape.

Key Findings:

1. **Market Capitalization by Company:** The analysis highlights the total market capitalization of major companies, with prominent players such as **Reliance Industries**, **Tata Motors**, and **State Bank of India (SBI)** standing out with substantial market caps.
2. **Comparative Market Cap Analysis:** When comparing companies, the report reveals variations in market capitalization across different sectors, showcasing how companies like **Tata Steel**, **Vedanta**, and **Larsen & Toubro** contribute differently to the overall market dynamics.
3. **Market Cap Breakdown by Company Grouping:** The analysis categorizes companies into **Large Cap**, **Mid Cap**, and **Small Cap**, providing a clearer picture of how companies of different sizes impact the market. Large-cap companies dominate the landscape, with small-cap companies contributing relatively less.
4. **Quarterly Sales Trends:** The data reveals quarterly sales figures, highlighting companies like **Tata Consultancy Services (TCS)** and **Indian Oil Corporation (IOC)** with the highest quarterly sales, reinforcing their significant roles in their respective industries.
5. **Market Cap by Company Grouping:** By categorizing companies into large, mid, and small-cap groups, it is evident that large-cap companies dominate in terms of both market capitalization and average quarterly sales.
6. **Market Cap Ratio:** The market cap ratio between large-cap, mid-cap, and small-cap companies showcases the overall market distribution, with large-cap companies holding a significantly higher portion of the market, followed by mid-cap and small-cap companies.
